REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

10 JAN 1910

EDGINSWELL

Kept at Manor House Edginswell nr Torquay
in the County of Devon.
by H Langford Brown.

RAIN GAUGE
Pattern Ordinary
Diameter of top 8 in.
Height of top above Ground 1 ft. 4 in.
„ Above „ Sea Level about 100 ft.

Time of Observation 10 a m

Nearest Railway Station
Name Kings Kerswell
Distance 1½ Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
3 JAN 1910

Kept at South Hill, Kingskerswell

in the County of Devon

by E. A. Foster

RAIN GAUGE	Pattern	
	Diameter of top	4 in.
	Height of top above Ground	1 ft. — in.
	" " " Sea Level	270 ft.

Time of Observation 9 am.

Nearest Railway Station: Name Kingskerswell; Distance 2¼; Direction WSW.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Eng

FORM A.
BRITISH RAINFALL.
24 JAN 1911
1/9

Kept at Polapit Tamar Launceston

in the County of Devon 2

by R. C. Coode Esq

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 315 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at Rock House, Lynmouth

in the County of Devon

by T. H. Mead-Briggs

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 11 in.
" " " Sea Level 22 ft. 3 inches

Time of Observation 9 a.m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

18 FEB 1911

REGISTER OF RAINFALL IN 1910.

Kept at Laployd

in the County of Devon 5

by Samuel C. Chapman, M.I.C.E. Water Engineer Torquay

RAIN GAUGE
Pattern
Diameter of top 5" in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 1041 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Moretonhampstead
Distance 4 miles. Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

18 FEB 1911

REGISTER OF RAINFALL IN 1910

Kept at Mardon

in the County of Devon 5

by Samuel C. Chapman, M. I.C.E., Water Engineer Torquay

Rain Gauge	Pattern	
	Diameter of top	8" in.
	Height of top above Ground	1 ft. 0 in.
	„ „ „ Sea Level	835 ft.

Time of Observation 9. a. m

Nearest Railway Station: Name Lustleigh; Distance 3 miles; Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

Kept at Bullaton

in the County of Devon

by Torquay Corporation Waterworks

Rain Gauge: Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 928 ft.

Time of Observation 9. A.M.

Nearest Railway Station: Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGIS 10

FORM A2.
BRITISH RAINFALL.
- 3 JAN 1911

Kept at *Twitchen. Mortehoe*

in the County of *Devon. 1*

by *Robt Nethercott for Dr G. B. Longstaff*

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 430 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Mortehoe
Distance 1½ Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
H RAINFALL.

7 JAN 1911

Kept at Northam Vicarage

in the County of Devon 3

by Prebendary Dimond-Churchward

RAIN GAUGE
Pattern no change
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 173 ft.

Time of Observation

Nearest Railway Station
Name Bideford
Distance 2 Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.
3 JAN 1911

Kept at Northleigh Rectory
in the County of Devon
by Mrs Walter Champernowne

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 7 in.
„ „ „ Sea Level 335 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Colyton
Distance 3 Direction S.E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

24 FEB 1911

REGISTER OF RAINFALL IN 1910

Kept at Freedom Fields Plymouth

in the County of Devon 2

by H Victor Prigg

RAIN GAUGE
Pattern M.O
Diameter of top 8 in.
Height of top above Ground 1 ft. - in.
„ „ „ Sea Level 208 ft.

Time of Observation 9 A

Nearest Railway Station
Name Mutley
Distance 3/4 mile Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

24 FEB 1911

1635

REGISTER OF RAINFALL IN 1910

Kept at The Hoe Plymouth

in the County of Devon 2

by H Victor Prigg

Rain Gauge
Pattern M.O.
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 117 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Millbay
Distance 3/4 mile Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A.
BRITISH RAINFALL.
30 JAN 1911

303

Kept at Huccaby House

in the County of S Devon 4

by R Burnard Esq

RAIN GAUGE
Pattern
Diameter of top ____ in.
Height of top above Ground ____ ft. ____ in.
" " " Sea Level ____ ft.

Time of Observation

Nearest Railway Station
Name
Distance ____ Direction ____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. JAN 1911

Kept at Ebberly, Beaford S.O.

in the County of Devon 3

by J. S. C. Davis

RAIN GAUGE
Pattern Snowdon, Kew verified
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 506 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Portsmouth Arms
Distance 4¼m Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A. BRITISH RAINFALL.
24 JAN 1911

1/10

Kept at Rousdon Lyme Regis
in the County of Devon
by C. Grover

7

Rain Gauge
Pattern
Diameter of top ..... in.
Height of top above Ground ..... ft. ..... in.
" " " Sea Level 516 ft.

Time of Observation

Nearest Railway Station
Name
Distance ..... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REC 910

FORM A2. BRITISH RAINFALL.
30 JAN 1911

Kept at Salcombe Regis Sidmouth

in the County of S. Devon

by Rev D Maclaren

7

RAIN GAUGE
Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation

Nearest Railway Station
Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

5 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Great Aish . S. Brent
in the County of Devon 3
by Catherine M. Kingwell

RAIN GAUGE
Pattern maker L. Casella
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 500 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Brent
Distance 1 m Direction S.E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

3 JAN 1911

Kept at Castle Hill School, Filleigh, S. Molton

in the County of Devon

by William H. Reeve

Rain Gauge:
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 363 ft.

Time of Observation 9 A. M.

Nearest Railway Station:
Name Filleigh
Distance 2 miles Direction SW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
5 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Cofton Vicarage

in the County of Devon

by The Rev C. F. Benthall

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level 60 ft.

Time of Observation 9 AM

Nearest Railway Station:
Name Starcross
Distance 1 Direction South of Station

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

7 JAN 1910

Exd R.M.L.

Kept at Statsford, Whitchurch Tavistock

in the County of Devon

by Edwin E Glyde

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 596 ft.

Time of Observation 9 am (9.17 am G.M.T.)

Nearest Railway Station
Name Tavistock (G.W.R.)
Distance 1·8 mile Direction NW.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by Miss M. Horner

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 260 ft.

Time of Observation 9. A.M

Nearest Railway Station
Name Teignmouth
Distance 1/2 mile Direction S.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

Accurate observers of rainfall will oblige by sending a copy of their record to Mr. G. J. SYMONS, of 62, Camden Square, London, N.W., for insertion in his annual tables of *British Rainfall*, which now contain returns from about 2,000 stations.

Additional Copies of this form (price 3d. each) can be obtained of the above, from Mr. STANFORD, 55, Charing Cross, and from all the leading opticians.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 10 in.
" " " Sea Level 450 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Tiverton
Distance 1½ miles Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A.
BRITISH RAINFALL.

23 JUN 1913

Kept at Templeton Rectory

in the County of Devon

by Rev. Jas. Fowler

Lat. 50° 54′ N Long. 3° 35′ W

Time of Observation 9 a.m

Nearest Railway Station Tiverton

Diameter of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A.
BRITISH RAINFALL.

30 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Torquay

in the County of S. Devon 5

by F. March Esq

RAIN GAUGE: Pattern

Diameter of top in.

Height of top above Ground ft. in.

" " " Sea Level ft.

Time of Observation

Nearest Railway Station: Name

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name Eggesford
Distance 2¼ Direction south

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

3 JAN 1911

Kept at Little Silver, Torrington
in the County of Devon
by S. L. Lloyd

3

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 395 ft.

Time of Observation 9 a. m.

Nearest Railway Station
Name Torrington
Distance 2¼ mls. Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at North Gate House
Totnes
in the County of Devon
4
by H. F. Lovejoy

Rain Gauge	Pattern	Standard Snowdon
	Diameter of top	8 in.
	Height of top above Ground	1 ft. in.
	„ „ „ Sea Level	ft.

Time of Observation 9 Am.

Nearest Railway Station: Name Totnes; Distance 300 yds; Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

25 JAN. 1910

Kept at Berry Pomeroy. Totnes

in the County of Devon

by Charles Barran

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 185 ft.

Time of Observation

Nearest Railway Station: Name Totnes
Distance 2m Direction W by N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

-1 MAR 1911

Kept at Berry Pomeroy. Totnes

in the County of S. Devon 4

by Charles Barran

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 185 ft.

Time of Observation

Nearest Railway Station
Name Totnes
Distance 2m Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

P. T. O

This differs by more than 2 inches from Mr. Norths Register. He lives less than 1/2 a mile away but below the hill in N.N.W direction –

I have noticed that rain squalls from W by N. W. & W by S very frequently keep along the top of the hill leaving the lower part of Westward Ho! dry.

As this has been a common type of weather this year it would I think quite account for the difference.

I venture to send you a record kept by a carpenter (Mr Littlejohn) who lives on the outskirts of Bideford as I do not think you have any gauge very near him. Mr. L is a careful man & has taken great care in his record.

Yrs ffy

I am a little in doubt as to whether the figures from the 17th to 23rd of August should not read in each case one day earlier. The amounts are correct, so the totals are not affected

Archd Boyd.
